

## LUBRIN® HL ISO-VG 32

HL ISO-VG 32 is optimum alloyed and has a good performance level and a wide range of applications within the whole industry working in variable temperature range from -32 to +260. It is characterized by good viscosity-temperature behavior, high aging stability and reliable corrosion protection. Effective additives provide even under extreme loads a best wear protection. The behavior against sealing materials is neutral.

### Recommended for:

DIN 51 524 / part 1 (HL)

| Typical characteristics |                    |        |       |
|-------------------------|--------------------|--------|-------|
| Data                    | Unit               | Method | Value |
| Density at 15°C         | Kg/L               | D-4052 | 0,870 |
| Viscosity at 40°C       | mm <sup>2</sup> /s | D 445  | 32    |
| Viscosity at 100°C      | mm <sup>2</sup> /s | D 445  | 6     |
| Viscosity index (VI)    |                    | D 2270 | 102   |
| Flash point (COC)       | °C                 | D 92   | 209   |
| Pour point              | °C                 | D 97   | -32   |
